

## SL ASI Sustainable Index UK Equity Pension Fund

Launch Information – 01/12/2020

(Fund Code – MGLB)

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

### Fund Description

The SL ASI Sustainable Index UK Equity Pension Fund invests primarily in the ASI Sustainable Index UK Equity Fund. The aim of the ASI Sustainable Index UK Equity Fund is summarised below.

The fund aims to generate growth over the long term (5 years or more) by tracking the return of the MSCI United Kingdom IMI Select ESG Climate Solutions Target Index.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in.

The investment performance you will experience from investing in the Standard Life version of the fund will vary from the investment performance you would experience from investing in the underlying funds directly. This will be as a result of a number of differences, such as charges, tax and timing of investment.

### Charges, Volatility Rating & Fund Type

### Composition by Fund Exposure

Holdings as at 01/12/2020

ASI Sustainable Index UK Equity Fund	100.00%
--------------------------------------	---------

#### Definition:

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

#### Key Risks

The fund can invest in a wide variety of investment strategies and assets. Below we document the specific or heightened risks applicable to the fund rather than an exhaustive list of all potential strategies or asset classes.

Collective Investment Schemes - The fund can invest in collective investment schemes which can themselves invest in a diverse range of other assets. These underlying assets may vary from time to time but each category of asset (which may include equities, bonds or immoveable property) has individual risks associated with them. The fund may not have any control over the activities of any collective investment scheme invested in by the fund.

Equities Risk - This fund can invest in equities which are one of the more volatile asset classes and can therefore suffer sudden sharp falls or rises. Equities can offer good growth potential over the longer term but may have a higher volatility than other asset classes.
